

QUINTA DO CRASTO

Single Quinta Port and Douro Wines

CRASTO ROSÉ 2017

Appellation

Douro

Viticultural Year

The 2017 harvest will go down in the as the earliest ever at Quinta do Crasto. An unusually warm and dry winter meant that the vines' growth cycle began earlier than normal. Low rainfall continued throughout the cycle leading to moderate water stress and the vines had to naturally adapt to these adverse weather conditions. Harvest began on 8 August, with the Viosinho grapes that would go into the Crasto White Wine 2017 blend. The rosé wine grapes were harvested on 22 August. This was an important decision since it allowed us the desired levels of freshness and natural acidity. On 18 August, we started picking the red grapes at the Quinta da Cabreira vineyard in the Douro Superior subregion. We are able to irrigate the grapes on this property. This was instrumental in keeping the vines working in a well-balanced fashion and enabled the berries to achieve perfect ripeness. In late August, evening temperatures fell significantly, which helped finish off the ripening of the grapes. A period of warm days combined with cool nights yielded the perfect balance, so that the harvest of the first Quinta do Crasto red grapes could begin. Dry days in September ensured a smooth harvest. The harvest wrapped up much earlier than normal, namely on 19 September. On balance, we can say that 2017 was a year of lower yields, with fewer bunches of smaller grapes, but that had excellent concentration and an optimal skin to pulp ratio. This was a challenging year for the viticulture and winemaking teams. We had to perfectly time the harvest to ensure maximum quality. 2017 will certainly go down in history as a year of exceptional wines. .

Grape Varieties

85% Tinta Roriz; 15% Touriga Nacional

Winemaking

The grapes, chosen from selected plots, are taken to the winery in 22 kg plastic boxes. On arrival in the winery they are rigorously inspected on a sorting table and they are then destemmed and gently pressed. Only the free run juice is used. It is sent to stainless steel tanks where it remains for 48 hours at 8°C for sedimentation. The alcoholic fermentation takes place in temperature-controlled stainless steel tanks at 14°C for 30 days.

Ageing

3 months in stainless steel vats, with occasional lees stirring.

Tasting Note

Bright salmon in colour, the wine delivers great aromatic freshness, with attractive notes of wild berry fruit nicely combined with elegant floral hints. Very appealing on the palate, showing good volume and a polished structure made up of soft-textured tannins and vibrant minerality. This is an engaging and balanced wine, with a refreshing finish.

Technical information

Age of Vines	Aspect, Soil and Altitude	Alcohol, ABV	Analysis	Winemaking
More than 20 years old	East - South Schist 400 m	13%	Total Acidity: 5,3 gr/L pH: 3,23 Residual Sugar gr/L: 3,5 gr/L	Manuel Lobo
